Act or Get Stuck

The 3D Career Method for Global Development

This book provides a structured method, practical tips and a step-by-step template on how to navigate the global development job market. Why do talented professionals get stuck in international careers, and what separates those who move with intention from those who wait to be noticed? Drawing on over 20 years' experience at the heart of HR in the United Nations, international financial institutions, and global nonprofits, Manuela Morelli demystifies how careers in international organizations really work. The book offers a holistic approach to professional development, combining real success stories, case studies, and innovative models to address job searches, networking, career conversations, and personal branding. It also looks at how AI is reshaping the field. "Empowering" rather than "instructing", it introduces the 3D Career Method — a clear framework that can be tailored to your own ambitions. The book is essential reading for current and aspiring professionals in international organizations, NGOs, and multilaterals, and for the HR practitioners, career advisors, and university career services who guide them.
