

Gladstone

Michael Faraday

Encouraged to share his memories of Michael Faraday (1791–1867), John Hall Gladstone (1827–1902) published in 1872 this short work about his late friend's life and career. Faraday's successor as Fullerian Professor of Chemistry at the Royal Institution, Gladstone discusses how Faraday approached science, and the value of his discoveries. Offering informed insights into Faraday's character, Gladstone includes a number of extracts from personal letters. The work also includes a translation of part of the eulogy given by Jean-Baptiste Dumas at the Académie des Sciences, as well as an anonymous poem honouring Faraday and published in Punch shortly after his death. An appendix lists the numerous learned societies to which Faraday belonged. Also reissued in this series are The Life and Letters of Faraday (1870), compiled by Henry Bence Jones, and John Tyndall's Faraday as a Discoverer (1868).
