

The FIDIC Contracts

It is vital to ensure that your company complies with its contractual obligations. It is also vital to check whether the other parties are complying with theirs. This book was written to help those involved in the management of busy construction projects to find answers to contractual issues arising from the FIDIC forms of contract. The book is organised in such a way that you can find answers in a fraction of the time it would take to study the full conditions of contract. This book sets out the contractual obligations of the Employer, the Contractor, the Engineer and the DAB in a simple tabular form, together with the time-frames in which they should be performed and the consequences of non-compliance. This means that you will have all the information at your fingertips without having to study lengthy contractual clauses. For those using the FIDIC forms for the first time, or perhaps not using them too often, this book is a must, whilst experienced users will find it provides a valuable checklist. Whichever category you fall into, using this book should improve both knowledge and efficiency. The book is ideal for engineers, quantity surveyors, contract managers and any person whose job it is to understand the workings of a FIDIC contract. Roger Knowles had this to say: "The most important part of any contract is the obligations of the parties, the time frames in which the parties must perform these obligations, and the consequences of failing to meet them. Failure to carry out obligations correctly is a serious risk and common source of contention or claims. This practical ready-reference on the contractual obligations of the various parties for a FIDIC construction contract promotes efficient administration of construction projects, prevents contention and aids an easier understanding of their obligations." The FIDIC Contracts: Obligations of the Parties is presented in an easily-referenced, tabular format. The Red, Pink, Red Book Subcontract, Yellow, Silver, Gold, Pink, Green and White Books are all included and for ease of reference, each contract is separated into sections relating to the Employer, the Contractor, the Engineer (or the equivalent) and the DAB. This guide's accessible style will enable all parties and personnel involved in the project to quickly check that their company is performing the required obligations correctly - and also to ensure that other parties are doing the same.
