

Human Memory

Third Edition

This book provides a complete survey of research and theory on human memory in three major sections. A background section covers issues of the history of memory, and basic neuroscience and methodology. A core topics section discusses sensory registers, mechanisms of forgetting, and short-term/working, nondeclarative, episodic, and semantic memory. Finally, a special topics section includes formal models of memory, memory for space and time, autobiographical memory, memory and reality, and more. Throughout, the author weaves applications from psychology, medicine, law, and education to show the usefulness of the concepts in everyday life and multiple career paths. Opportunities for students to explore the assessment of memory in laboratory-based settings are also provided. Chapters can be covered in any order, providing instructors with the utmost flexibility in course assignments, and each one includes an overview, key terms, Stop and Review synopses, Try it Out exercises, Improving Your Memory and Study in Depth boxes, study questions, and Putting It All Together and Explore More sections. This text is intended for undergraduate or graduate courses in human memory, human learning and memory, neuropsychology of memory, and seminars on topics in human memory. It can also be used for more general cognitive psychology and cognitive science courses. New to this edition: - Now in full color. - More tables, graphs, and photos to help students visualize concepts. - Improving Your Memory boxes highlight the practical aspects of memory, and Study in Depth boxes review the steps of how results were constructed. - The latest memory research on the testing effect, the influences of sleep, memory reconsolidation, childhood memory, the default mode network, neurogenesis, and more. - Greater coverage of neuroscience, fMRIs, and other recent advances such as NIRS and pupillometry. - A website at www.routledge.com/cw/radvansky with outlines, review points, chapter summaries, key terms with definitions, quizzes, and links to related websites, videos, and suggested readings for students as well as PowerPoints, multiple-choice and essay questions, discussion questions, and a conversion guide for current adopters for instructors.
