

Innovation Driven Institutional Research

Towards Integral Development

This is the third volume in the CARE-ing for Integral Development series. It continues to build on the previous two works, Community Activation and Awakening Integral Consciousness, as well as preceding the fourth and final book, Embodying Integral Development. This book serves as a follow-up to the author's approach to integral research and development, economics and enterprise, contained within the Innovation and Transformation series, and as a focus for how put all of this "CARE-fully" to work. This third volume, in the CARE quartet is perhaps the most crucial one, building on the organizational systems (see Awakening Integral Consciousness) that came before and turning from trans-cultural and transformational to trans-disciplinary, from integral reality and integral rhythm to integral realms, with a view ultimately to transpersonal, integral rounds. The author turns his attention to research and innovation, and then focuses in on enterprise and economics, management and leadership. As such, he introduces his Inter-Institutional Genealogy in place of an "integral", yet still inhibiting, university. In the process this book paves the way for a new kind of institutionalized, innovation driven social research, which, while rooted in a particular place, speaks to the world as a whole. Moreover, such a research-and-innovation institution has a fundamental role to play in the evolution of a specific community, building on what has come CARE-wise before.
