

Working the Sahel

This book looks at how people in the semi-arid conditions of the Sahel cope with their harsh environment. It draws on four years of field research with farmers in the Sahelian region and builds on work with these communities over several decades. Reporting on studies of four village communities, it shows how people work to achieve sustainable livelihoods and emphasises that there can be development without disaster.

Drawing on four years of field research, the authors look at how farmers manage biological resources, crop and non-crop biodiversity, soil fertility, and transform the landscape through agricultural intensification.
