

## The Urban Condition

This book will speak to the new human epoch, the Urban Age. A majority of humanity now lives for the first time in cities. The city, the highest invention of the modern age, is now the human heartland. And yet the same process that brought us the city and its wonders, modernisation, has also thrown up challenges and threats, especially climate change, resource depletion, social division and economic insecurity. This book considers how these threats are encountered and countered in the urban age, focusing on the issue of human knowledge and self-awareness, just as Hannah Arendt's influential *The Human Condition* did half a century ago. The *Human Condition* is now *The Urban Condition*. And it is this condition that will define human prospects in an age of default and risk. Gleeson expertly explores the concept through three main themes. The first is an exploration of what defines the current human condition, especially the expanding cities that are at the heart of an over-consumptive world economic order. The second exposes and reviews the reawakening of forms of knowledge ('naturalism') that are likely to worsen not improve our comprehension of the crisis. The new 'science of urbanism' in popular new literature exemplifies this dangerous trend. The third and last part of the book considers prospects for a new urban, and therefore human, dispensation, 'The Good City'. We must first journey in our urban vessels through troubled times. But can we now start to plot the way to new shores, to a safer, more resilient city that provides for human flourishing? *The Urban Condition* attempts this ideal, conceiving a new urbanism based on the old idea of self-limitation. *The Urban Condition* is an original, timely book that reconsiders and redeploys Arendt's famous notion of *The Human Condition* in an age of cities and risk. It brings together several important strands of human consideration, urbanisation, climate threat, resource depletion, economic default and critical knowledge and weaves them into a new analysis of the times. It also looks to a future that is nearly with us—of changed climate, resource scarcity and economic stress. The book journeys into these troubled times, proposing the idea of Lifeboat Cities as a way of thinking about the human journey to come
