

Engage the Brain

Games, Grade Five

A Corwin Press Classroom Activity Book Real learning can be fun with games for the brain! The Engage the Brain: Games series offers practical activities that energize students, increase brain connections to content, and reinforce learning in a nonthreatening atmosphere. Derived from tested, research-based strategies found in the bestseller Worksheets Don't Grow Dendrites, this book provides activities that incorporate games aligned with national academic standards for language arts, math, science, social studies, physical education, art, and music. You will find brain-friendly activities that can be integrated easily into your lesson plans to inspire enthusiasm and help students achieve. Each game provides learning objectives, a comprehensive materials list, step-by-step guidelines for playing the game, activities for extended learning, and required reproducibles such as game cards, game boards, and scorecards. Discover favorites such as Simon Says, Scavenger Hunt, and Relay Races applied to fifth-grade content in games like Mystery Measure Relay, Camouflage Tag, and A-maze-ing Expeditions. All games include a focus activity, modeling, guided practice, independent practice, and a closing. Students actively process content as they play existing games, and construct and design a variety of new ones. Use these engaging activities to supplement your curriculum goals in - Writing and editing - Decimals, measurement, and charting - State capitals, geography, and history - Physical, earth, life, and space sciences - Art, music, physical education, and much more! Watch your students thrive and grow with creative experiences that incorporate movement, teamwork, healthy competition, and interpersonal skills!

These exciting new resources offer fun, innovative games covering all the content areas. Based on the most recent brain research, the games engage students in becoming active, motivated learners.
