

Peace Through Media

This book equips students and practicing journalists with information on why and how to implement a course of action for Peace Journalism. Secondary literature and primary examples are used within all chapters to offer a personal examination of the importance of applying concepts of Peace Journalism in the field as journalists cover conflict. *Peace Through Media* also identifies how journalism and political science are merging in areas related to conflict resolution. By understanding how both the journalists and the political scientists think about Peace Journalism, collaboration may follow and the benefits of finding peaceful resolutions to conflicts may be a possibility.
