Sparse Representation, Modeling and Learning in Visual Recognition

Theory, Algorithms and Applications

This unique text/reference presents a comprehensive review of the state of the art in sparse representations, modeling and learning. The book examines both the theoretical foundations and details of algorithm implementation, highlighting the practical application of compressed sensing research in visual recognition and computer vision. Topics and features: describes sparse recovery approaches, robust and efficient sparse representation, and large-scale visual recognition; covers feature representation and learning, sparsity induced similarity, and sparse representation and learning-based classifiers; discusses low-rank matrix approximation, graphical models in compressed sensing, collaborative representation-based classification, and high-dimensional nonlinear learning; includes appendices outlining additional computer programming resources, and explaining the essential mathematics required to understand the book.

Artikelnummer: 9781447167136

Medium: Buch

ISBN: 978-1-4471-6713-6

Verlag: Springer

Erscheinungstermin: 09.06.2015

Sprache(n): Englisch

Auflage: 2015

Serie: Advances in Computer Vision and Pattern Recognition

Produktform: Gebunden

Gewicht: 5325 g

Seiten: 257

Format (B x H): 160 x 241 mm
