

Optimization for Computer Vision

An Introduction to Core Concepts and Methods

This practical and authoritative text/reference presents a broad introduction to the optimization methods used specifically in computer vision. In order to facilitate understanding, the presentation of the methods is supplemented by simple flow charts, followed by pseudocode implementations that reveal deeper insights into their mode of operation. These discussions are further supported by examples taken from important applications in computer vision. Topics and features: provides a comprehensive overview of computer vision-related optimization; covers a range of techniques from classical iterative multidimensional optimization to cutting-edge topics of graph cuts and GPU-suited total variation-based optimization; describes in detail the optimization methods employed in computer vision applications; illuminates key concepts with clearly written and step-by-step explanations; presents detailed information on implementation, including pseudocode for most methods.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9781447170655

Medium: Buch

ISBN: 978-1-4471-7065-5

Verlag: Springer

Erscheinungstermin: 23.08.2016

Sprache(n): Englisch

Auflage: Softcover Nachdruck of the original 1. Auflage 2013

Serie: Advances in Computer Vision and Pattern Recognition

Produktform: Kartoniert

Gewicht: 4656 g

Seiten: 257

Format (B x H): 155 x 235 mm
