

Embedded Systems Development

From Functional Models to Implementations

This book offers readers broad coverage of techniques to model, verify and validate the behavior and performance of complex distributed embedded systems. The authors attempt to bridge the gap between the three disciplines of model-based design, real-time analysis and model-driven development, for a better understanding of the ways in which new development flows can be constructed, going from system-level modeling to the correct and predictable generation of a distributed implementation, leveraging current and future research results.

Artikelnummer: 9781493901203

Medium: Buch

ISBN: 978-1-4939-0120-3

Verlag: Copernicus

Erscheinungstermin: 06.08.2015

Sprache(n): Englisch

Auflage: Softcover Nachdruck of the original 1. Auflage 2014

Serie: Embedded Systems

Produktform: Kartoniert

Gewicht: 3577 g

Seiten: 223

Format (B x H): 155 x 235 mm
