

## Psychoneuroimmunology

Psychoneuroimmunology (PNI) has developed rapidly in the last four decades. As a multidisciplinary area, PNI may provide a scientific basis for mind-body relationships toward the development of personalized and systems medicine. In

*Psychoneuroimmunology:Methods and Protocols*, expert researchers in the field detail methods and protocols geared toward the development of integrative and individualized therapeutics in multiple dimensions from drugs to behaviors. Written in the highly successful *Methods in Molecular Biology*™ series format, the chapters include the kind of detailed description and implementation advice that is crucial for getting optimal results in the laboratory.

Thorough and intuitive, *Psychoneuroimmunology:Methods and Protocols* aids scientists in continuing to study holistic views for the translation of psychoneuroimmunology into better preventive and personalized medical practice.
