

Legembre

CD95

Methods and Protocols

This volume provides the most commonly used methods and protocols to study the apoptotic and non-apoptotic roles of CD95. Chapters explore molecular, biochemical, cellular methods and animal models to in order to better understand the biological functions of this cytokine. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls.

Authoritative and practical, *CD95: Methods and Protocols* aims to foster original research on CD95/CD95L couple.
