Pro C# 2008 and the .NET 3.5 Platform

.NET 3.5 is Microsoft's largest development software launch since .NET 2.0 and (unlike .NET 3.0) completely replaces all previous .NET versions. A new version of Visual Studio – Visual Studio 'Orcas' is being created for the new Framework together with new versions of both the C# and Visual Basic languages. This book deals with this new C# language. The book provides developers with a complete treatise on the new technology explaining the importance of all the new features (lambda expressions, LINQ, ASP.NET AJAX, WPF everywhere).and how they integrate into the framework of the previous .NET versions. It is a comprehensively revised and updated version of author's award winning previous titles.
