

Reference Range Values for Pediatric Care

Completely updated, this popular pocket guide provides commonly used reference ranges and values spanning birth through adolescence; plus, data needed for treatment of preterm and other newborns. This resource helps reduce search time for reference ranges and other critical values to optimize patient assessment and treatment. Topics Include - Conversions (conversion formulas and temperature conversions) - Assessment scales and scoring - Growth charts - Blood pressure ranges - Clinical chemistry values - Immunization and periodicity schedules - Hyperbilirubinemia management - Rate and gap calculations - Nutrition, formula preparation, and caloric counts - Umbilical vein and artery catheterization measurements - Dosages and levels of common antibiotic and antiseizure medications
