Online Distance Learning Course Design and Multimedia in E-Learning

In recent years, the rampant development of worldwide communications and powerful new technologies has reformulated the idea of distance learning and the transmission of higher education content. This book brings together academics and researchers to exchange and share their experiences and findings on all features of E-Learning. It includes the most recent innovations, case studies of relevant and fruitful applications in this field, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of e-Learning, for effective teaching and learning. The development and usage of innovative technologies, methods, and techniques are also highlighted. In a moment in which distance learning is more important than ever, this book provides an opportunity for all to share and present their contributions. The book seeks and disseminates research, experiences, and philosophies about innovation regarding teaching and learning in higher education and shares the latest research, analysis, and development of online education, effective online teaching methods, and course design; it is ideal for academics, educators, school counselors, principals, technologists, and scientists.

In recent years, the rampant development of worldwide communications and powerful modern technologies has reformulated the idea of distance learning and the transmission of higher education content. Combined with these new developments and the outcomes of the COVID-19 pandemic, there is an apparent need for a thorough discussion on all features of e-learning. Online Distance Learning Course Design and Multimedia in E-Learning disseminates research, experiences, and philosophies surrounding innovation within higher education online teaching and learning environments. It includes case studies of relevant and fruitful applications, practical challenges, and examinations of the most recent innovations. Covering topics such as online management education, student engagement, and gamification, this book is an essential resource for academicians, researchers, educators, pre-service educators, principals, administrators, consultants, instructional designers, technologists, computer scientists, and policymakers.
