

## Learning in Motion

101+ Sensory Activities for the Classroom

- Learning in Motion is a must-have resource for all therapists and educators. - Sensory Processing Disorder (SPD) is a neurological condition in children that can affect the way the brain processes information from the senses. - It's estimated that one in 6 children have sensory processing difficulties. - Features: The table of contents lists the theme-based activities by months. A synopsis of motor development to help the reader understand the importance of the activities in the book is included. The next section describes the educationally relevant sensorimotor addressed by the activities as those goals relate to child development and educational performance.
