

Integrals and Series

Volumes 4 and 5 of the extensive series Integrals and Series are devoted to tables of Laplace Transforms. In these companion volumes the authors have collected data scattered throughout the literature, and have augmented this material with many unpublished results obtained in their own research. Volume 4 contains tables of direct Laplace transforms, a number of which are expressed in terms of the Meijer G-function. When combined with the table of special cases, these formulas can be used to obtain Laplace transforms of numerous elementary and special functions of mathematical physics. Volume 5 offers tables of inversion formulas for the Laplace transformation and includes tables of factorization and inversion of various integral transforms.
