

Macromolecular Protein Complexes III: Structure and Function

This book covers important topics such as the dynamic structure and function of the 26S proteasome, the DNA replication machine: structure and dynamic function and the structural organization and protein-protein interactions in the human adenovirus capsid, to mention but a few.

The 18 chapters included here, written by experts in their specific field, are at the forefront of scientific knowledge. The impressive integration of structural data from X-ray crystallography with that from cryo-electron microscopy is apparent throughout the book. In addition, functional aspects are also given a high priority.

Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
