

Beyond Belief

Opportunities for Faith-Engaged Approaches to Climate-Change Adaptation in the Pacific Islands

This interdisciplinary book explores the science and spirituality nexus in the Pacific Islands Region and as such makes a critical contribution to sustainable climate change adaptation in Oceania. In addition to presenting case studies, literary analyses, field projects, and empirical research, the book describes faith-engaged approaches through the prism of: • Context: past, present, and future prospects • Theory: concepts, narratives, and theoretical frameworks • Practice: empirical research and praxis-informed case examples • Doctrine: scriptural contributions and perspectives • Engagement: enlisting religious stakeholders and constituencies

Comprising peer-reviewed works by scholars, professionals, and practitioners from across Oceania, the book closes a critical gap in the literature and represents a groundbreaking contribution to holistic climate change adaptation in the Pacific Islands Region that is scientifically sound, spiritually attuned, locally meaningful, and contextually compelling.

This interdisciplinary book explores the science and spirituality nexus in the Pacific Islands Region and as such makes a critical contribution to sustainable climate change adaptation in Oceania. In addition to presenting case studies, literary analyses, field projects, and empirical research, the book describes faith-engaged approaches through the prism of: ¿ Context: past, present, and future prospects¿ Theory: concepts, narratives, and theoretical frameworks¿ Practice: empirical research and praxis-informed case examples¿ Doctrine: scriptural contributions and perspectives¿ Engagement: enlisting religious stakeholders and constituencies
