

Facility Layout

Mathematical Optimization Techniques and Engineering Applications

This book presents a structured approach to develop mathematical optimization formulations for several variants of facility layout. The range of layout problems covered includes row layouts, floor layouts, multi-floor layouts, and dynamic layouts. The optimization techniques used to formulate the problems are primarily mixed-integer linear programming, second-order conic programming, and semidefinite programming. The book also covers important practical considerations for solving the formulations. The breadth of approaches presented help the reader to learn how to formulate a variety of problems using mathematical optimization techniques. The book also illustrates the use of layout formulations in selected engineering applications, including manufacturing, building design, automotive, and hospital layout.

Artikelnummer: 9783030709891

Medium: Buch

ISBN: 978-3-030-70989-1

Verlag: Palgrave Macmillan

Erscheinungstermin: 25.04.2021

Sprache(n): Englisch

Auflage: 1. Auflage 2021

Serie: EURO Advanced Tutorials on Operational Research

Produktform: Gebunden

Gewicht: 360 g

Seiten: 114

Format (B x H): 160 x 241 mm
