

Recent Advances in Electrical Engineering, Electronics and Energy

Proceedings of the CIT 2020 Volume 2

This book constitutes the proceedings of the XV Multidisciplinary International Congress on Science and Technology (CIT 2020), held in Quito, Ecuador, on 26–30 October 2020, proudly organized by Universidad de las Fuerzas Armadas ESPE in collaboration with GDEON. CIT is an international event with a multidisciplinary approach that promotes the dissemination of advances in Science and Technology research through the presentation of keynote conferences. In CIT, theoretical, technical, or application works that are research products are presented to discuss and debate ideas, experiences, and challenges. Presenting high-quality, peer-reviewed papers, the book discusses the following topics:

- Electrical and Electronic • Energy and Mechanics

Noise Data Removal Method of Frequency Response Curve Based on MNKriging Interpolation Algorithm.- An Analysis Method of Multi Round Interactive Semantics for Power Enterprises based on Solr Engine.- Simplification Method of Two-Level Stroke Line Based on Painting Sequence.- Typical Risk Situations in Driving Situations.- Construction of Smart Campus under the Background of Big Data.
