Ismail / Dahalan / Öchsner

Advanced Materials and Engineering Technologies

This book reports on various real-world and global engineering problems while touching on evolving design strategies. The chapters were selected from the 2nd International Conference on Marine and Advanced Technologies 2021 (ICMAT 2021). The papers discuss best practice and theory in relation to multi-disciplinary approaches in materials engineering technology. Among the topics are advanced materials, applied science, marine engineering and energy application.
