

Visual Methods for Social Justice in Education

This book makes a case for the usefulness of visual research methods for advancing a social justice agenda in education. The author aims to provide education researchers with a wide range of qualitative visual research tools to invoke different stories, voices, embodiments, and experiences of individuals from marginalized communities; to advance emancipatory research projects; to embrace interdisciplinary knowledge-building; and to counter-narrate Western forms of knowledge, cultures, and values for the reimagining of education for social change. It draws attention to the importance of visual methods in today's neoliberal landscape of education to speak back to mainstream research and practices, especially when research participants lack words to describe, express, and represent what it means to be impacted by oppression and marginalization.
