

Crowd Dynamics, Volume 4

Analytics and Human Factors in Crowd Modeling

This contributed volume explores innovative research in the modeling, simulation, and control of crowd dynamics. Chapter authors approach the topic from the perspectives of mathematics, physics, engineering, and psychology, providing a comprehensive overview of the work carried out in this challenging interdisciplinary research field.

The volume begins with an overview of analytical problems related to crowd modeling. Attention is then given to the importance of considering the social and psychological factors that influence crowd behavior – such as emotions, communication, and decision-making processes – in order to create reliable models. Finally, specific features of crowd behavior are explored, including single-file traffic, passenger movement, modeling multiple groups in crowds, and the interplay between crowd dynamics and the spread of disease.

Crowd Dynamics, Volume 4 is ideal for mathematicians, engineers, physicists, and other researchers working in the rapidly growing field of modeling and simulation of human crowds.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783031463587

Medium: Buch

ISBN: 978-3-031-46358-7

Verlag: Springer International Publishing

Erscheinungstermin: 14.12.2023

Sprache(n): Englisch

Auflage: 1. Auflage 2023

Serie: Modeling and Simulation in Science, Engineering and Technology

Produktform: Gebunden

Gewicht: 553 g

Seiten: 246

Format (B x H): 160 x 241 mm
