

Engineering Applications of Artificial Intelligence

Making intelligent devices and systems is the science and engineering of artificial intelligence (AI). In order to solve many of the most difficult problems in computer science, this important multidisciplinary discipline plays a crucial role in the field of technology nowadays. The book also addresses the topic of machine learning because it is closely related to AI. By no means is the list of subjects below intended to be comprehensive. The main objective of this book is to provide researchers, scientists, business professionals, and academics insight into original theories and research findings on the use of human cognitive models in diverse real-world computing applications. Through this book, the authors built an interdisciplinary forum where researchers from many fields may share their work and explore how to engineer human brain processes, learning mechanisms, and decision-making processes.

Artikelnummer: 9783031502996
Medium: Buch
ISBN: 978-3-031-50299-6
Verlag: Springer
Erscheinungstermin: 20.02.2024
Sprache(n): Englisch
Auflage: 1. Auflage 2024
Serie: Synthesis Lectures on Engineering, Science, and Technology
Produktform: Gebunden
Gewicht: 1027 g
Seiten: 443
Format (B x H): 173 x 246 mm
