

Materials Informatics III

Polymers, Solvents and Energetic Materials

This contributed volume focuses on the application of machine learning and cheminformatics in predictive modeling for organic materials, polymers, solvents, and energetic materials. It provides an in-depth look at how machine learning is utilized to predict key properties of polymers, deep eutectic solvents, and ionic liquids, as well as to improve safety and performance in the study of energetic and reactive materials. With chapters covering polymer informatics, quantitative structure–property relationship (QSPR) modeling, and computational approaches, the book serves as a comprehensive resource for researchers applying predictive modeling techniques to advance materials science and improve material safety and performance.

Artikelnummer: 9783031787263

Medium: Buch

ISBN: 978-3-031-78726-3

Verlag: Springer

Erscheinungstermin: 02.03.2026

Sprache(n): Englisch

Auflage: Erscheinungsjahr 2026

Serie: Challenges and Advances in Computational Chemistry and Physics

Produktform: Kartoniert

Seiten: 371

Format (B x H): 155 x 235 mm
