

Developments in Information and Knowledge Management Systems for Business Applications

Volume 8

In this series, we delve into the challenges and opportunities of managing business information efficiently. We explore various aspects of information processing for effective enterprise management, including methods, techniques, and strategies. Our goal is to provide solutions for competent information management that increases business usage, while also analyzing strategies to reduce data loss and improve customer satisfaction and maintenance levels. Our book offers practical knowledge on different facets of information and knowledge management in businesses, such as information processing theory and models, the benefits and implementation challenges of information/knowledge business, and information management methods for creating a global information society. We also cover topics such as collecting and analyzing data for enterprise management, modern business intelligence solutions and data management, information marketing, and innovative development of the enterprise information system. Our focus is on applications, benefits, and encounters within the field of efficient business information processing, and we offer solutions to increase performance using the latest IT technologies.
