

Computational and Experimental Simulations in Engineering

Proceedings of ICCES 2024-Volume 4

This book gathers the latest advances, innovations, and applications in the field of computational engineering, as presented by leading international researchers and engineers at the 30th International Conference on Computational & Experimental Engineering and Sciences (ICCES), held in Singapore on August 3–6, 2024. ICCES covers all aspects of applied sciences and engineering: theoretical, analytical, computational, and experimental studies and solutions of problems in the physical, chemical, biological, mechanical, electrical, and mathematical sciences. As such, the book discusses highly diverse topics, including composites; bioengineering and biomechanics; geotechnical engineering; offshore and arctic engineering; multi-scale and multi-physics fluid engineering; structural integrity and longevity; materials design and simulation; and computer modeling methods in engineering. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

Artikelnummer: 9783031829093

Medium: Buch

ISBN: 978-3-031-82909-3

Verlag: Springer

Erscheinungstermin: 18.03.2026

Sprache(n): Englisch

Auflage: Erscheinungsjahr 2026

Serie: Mechanisms and Machine Science

Produktform: Kartoniert

Gewicht: 1480 g

Seiten: 986

Format (B x H): 155 x 235 mm
