

Model Predictive Control

Engineering Methods for Economists

The book explores the field of model predictive control (MPC). It reports on the latest developments in MPC, current applications, and presents various subfields of MPC. The book features topics such as uncertain and stochastic MPC variants, learning and neural network approaches, easy-to-use numerical implementations as well as multi-agent systems and scheduling and coordination tasks. While MPC is rooted in engineering science, this book illustrates the potential of using MPC theory and methods in non-engineering sciences and applications such as economics, finance, and environmental sciences.

Artikelnummer: 9783031852558

Medium: Buch

ISBN: 978-3-031-85255-8

Verlag: Springer

Erscheinungstermin: 08.06.2025

Sprache(n): Englisch

Auflage: Erscheinungsjahr 2025

Serie: Dynamic Modeling and Econometrics in Economics and Finance

Produktform: Gebunden

Gewicht: 522 g

Seiten: 224

Format (B x H): 160 x 241 mm
