

Gerontechnology VI

This book gathers peer-review contributions to the 7th International Workshop on Gerontechnology, IWoG 2024, held on November 28, 2024, in Évora, Portugal. They report on cutting-edge technologies and optimized workflows for promoting active aging and assisting older adults at home, as well as in healthcare centers. They discuss the main challenges in the development, use and delivery of health care services and technologies. Besides proposing solutions for improving monitoring and management of health parameters and age-related diseases, the chapters also describe approaches for helping seniors in their daily tasks and facilitating their communication and integration with assistive technologies. All in all, this book provides health professionals, researchers, and service providers with extensive information on the latest trends in the development and application of gerontechnology, with a special emphasis on improving quality of life and social integration of the elderly.
