

Artificial Intelligence for Inspired Action

The Technology We Need for the World We Want

In an age where algorithms shape our every move, this book offers an inspiring reframe: What if AI could amplify what makes us both human—and humane?

Artificial Intelligence for Inspired Action explores how natural intelligence can guide ProSocial AI. Drawing on the POZE paradigm, Cornelia C. Walther weaves global stories and systemic insights to spotlight hybrid intelligence—where human values and machine power meet. As reliance on AI risks slipping into dependence, she proposes double literacy—human and algorithmic—to reclaim agency. A wake-up call and guide in one, this book invites changemakers to lead with integrity and design a future worth living.
