Innovating for Tomorrow: Engineering Technology

Stories from Faculty, Students, and Industry Professionals

This book is intended for anyone interested in the evolving landscape of engineering technology, particularly as it highlights the invaluable contributions of women in this field. By offering a unique perspective on a group of faculty, current and past students, the book not only inspires students to explore diverse career paths but also serves as a vital resource for mentors navigating the complexities of guiding young minds during pivotal moments in their education. The authors delve into the challenges and opportunities within and paths to engineering technology, providing practical insights and fostering a spirit of problem-solving and innovation. Reading this book means investing in a future where different voices are celebrated, and aspiring students are empowered to pursue their passions with confidence and clarity.
