

Geometry at Infinity

Final volume of the DFG Priority Programme 2026

This volume contains a collection of survey and research papers written by experts in differential geometry, geometric topology, and global analysis. It provides an overview of recent developments related to the theme Geometry at Infinity. Special emphasis is placed on the interconnections between these different fields. The papers are written for graduate students and researchers with a general interest in geometry who wish to keep abreast of current trends in these central areas of modern mathematics.
