León-Castro / Blanco-Mesa / Alfaro-Garcia

Novel Developments and Applications in Computational Intelligence, Management, Engineering, Innovation and Sustainability

The book entitled Novel Developments and Applications in Computational Intelligence, Management, Engineering, Innovation and Sustainability is a compilation of applications of computational intelligence methodologies and tools to business, government, and social issues. This book presents, in a systematic way, different methodologies for addressing real problems, generating impact, and proposing strategies, public policies, and future lines of research that support comprehensive solutions to current problems.
