Noninvasive Mechanical Ventilation

Theory, Equipment, and Clinical Applications

The new edition presents updates regarding new clinical applications of noninvasive mechanical ventilation and discusses recent technical advances in this field. The opening sections are devoted to theory, equipment, with new chapters on clinical applications in emergency medicine, critical care and sleep medicine, with detailed attention to current studies on NIV-CPAP, innovative clinical implications of NIV-CPAP devices. Due attention is also paid to new ventilation modes and the development of synchronization and patient ventilator interaction results. The closing chapters examine clinical indication. Written by internationally recognized experts in the field, this book will be an invaluable guide for both clinicians and researchers.
