Enhanced Building Information Models

Using IoT Services and Integration Patterns

53,49 €
49,99 € (zzgl. MwSt.)

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783319218243
Medium: Buch
ISBN: 978-3-319-21824-3
Verlag: Palgrave Macmillan
Erscheinungstermin: 09.10.2015
Sprache(n): Englisch
Auflage: 1. Auflage 2015
Serie: SpringerBriefs in Computer Science
Produktform: Kartoniert
Gewicht: 2175 g
Seiten: 121
Format (B x H): 155 x 235 mm

This book explains how to combine and exploit sensor networks and internet-of-things (IoT) technologies and Web-service design patterns to enrich and integrate Building Information Models (BIMs). It provides approaches and software architectures for facilitating the interaction with (and between) BIMs through Web services, and for enabling and facilitating the fusion of the information residing in such models or of information acquired from IoT technologies. The proposed software architectures are presented in the form of design patterns. This information fusion will facilitate many novel application fields ranging from emergency response, to urban monitoring and surveillance, and to smart buildings.

The book consists of 8 chapters. The first 2 chapters focus on the basics of BIMs, while chapter 3 presents fundamental service-oriented architecture patterns for complex information models. Subsequently, chapters 4 and 5 elaborate on the hardware and software side of IoT, with aspecial focus on their use for BIMs. Chapter 6 provides advanced SOA patterns for BIMs, while chapter 7 details patterns for IoT, and for BIM and IoT information fusion. Lastly, chapter 8 summarizes the work and provides an outlook on promising future developments.

Overall, the book will be beneficial for researchers and developers in the fields of building information models, IoT applications, and systems integration.
