

Spatial Econometric Interaction Modelling

This contributed volume applies spatial and space-time econometric methods to spatial interaction modeling. The first part of the book addresses general cutting-edge methodological questions in spatial econometric interaction modeling, which concern aspects such as coefficient interpretation, constrained estimation, and scale effects. The second part deals with technical solutions to particular estimation issues, such as intraregional flows, Bayesian PPML and VAR estimation. The final part presents a number of empirical applications, ranging from interregional tourism competition and domestic trade to space-time migration modeling and residential relocation.

Artikelnummer: 9783319301945

Medium: Buch

ISBN: 978-3-319-30194-5

Verlag: Springer International
Publishing

Erscheinungstermin: 03.08.2016

Sprache(n): Englisch

Auflage: 1. Auflage 2016

Serie: Advances in Spatial Science

Produktform: Gebunden

Gewicht: 8395 g

Seiten: 468

Format (B x H): 160 x 241 mm
