

Advanced Microsystems for Automotive Applications 2014

Smart Systems for Safe, Clean and Automated Vehicles

The automobile is going through the biggest transformation in its history. Automation and electrification of vehicles are expected to enable safer and cleaner mobility. The prospects and requirements of the future automobile affect innovations in major technology fields like driver assistance systems, vehicle networking and drivetrain development. Smart systems such as adaptive ICT components and MEMS devices, novel network architectures, integrated sensor systems, intelligent interfaces and functional materials form the basis of these features and permit their successful and synergetic integration. It has been the mission of the International Forum on Advanced Microsystems for Automotive Applications (AMAA) for more than fifteen years to detect novel trends and to discuss the technological implications from early on. Therefore, the topic of the AMAA 2014 will be "Smart Systems for Safe, Clean and Automated Vehicles". This book contains peer-reviewed papers written by leading engineers and researchers which all address the ongoing research and novel developments in the field.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783319363035

Medium: Buch

ISBN: 978-3-319-36303-5

Verlag: Springer

Erscheinungstermin: 17.09.2016

Sprache(n): Englisch

Auflage: Softcover Nachdruck of the original 1. Auflage 2014

Serie: Lecture Notes in Mobility

Produktform: Kartoniert

Gewicht: 493 g

Seiten: 301

Format (B x H): 155 x 235 mm
