Alleviating World Suffering

The Challenge of Negative Quality of Life

This is the first volume on the subject of the alleviation of world suffering. At the same time it is also the first book framing the fields of global socio-economic development, world health, human rights, peace studies, sustainability, and poverty within the challenge of alleviating suffering and improving quality of life. Both international studies and global development have become specialized and fragmented, whereas this work assembles all of these development fragments together in order to determine whether common ground exists to make headway in reducing global suffering. Leading experts in these various fields of development and suffering have been recruited worldwide to give scholarly assessments of the major human problems and how they can be successfully tackled.
