Richman

Constructive Mathematics

Proceedings of the New Mexico State University Conference Held at Las Cruces, New Mexico, August 11-15, 1980

Seidenberg's condition P.- Field extensions.- Dedekind domains.- Effective mathematics - the computer algebra viewpoint.- On some open problems in constructive probability theory.- Consistency and independence results in intuitionistic set theory.- Errata.- Computability of ordinal recursion of type level two.- A constructive approach to classical mathematics.- Remarks on the notion of standard non-isomorphic natural number series.- Reflections on Bishop's philosophy of mathematics.- Formalizing constructive mathematics: Why and how?.- Independence of premisses and the free topos.- An intuitionistic infinitesimal calculus.- Liberal constructive set theory.- Locating metric complements in ?n.- A disjunctive decomposition theorem for classical theories.- Towards a constructive foundation for quantum mechanics.- About infinity, finiteness and finitization (in connection with the foundations of mathematics).- A class of theorems with valid constructive counterparts.- Rational constructive analysis.

Artikelnummer: 9783540108504
Medium: Buch
ISBN: 978-3-540-10850-4
Verlag: Springer
Erscheinungstermin: 01.08.1981
Sprache(n): Englisch
Auflage: 1. Auflage 1981
Serie: Lecture Notes in Mathematics
Produktform: Kartoniert
Gewicht: 1100 g
Seiten: 350
Format (B x H): 155 x 235 mm
