

Numerical Analysis

Proceedings of the 9th Biennial Conference Held at Dundee, Great Britain, June 1981

A second-order method for solving the continuous multifacility location problem.- Data smoothing by divided differences.- On the control of the global error in stiff initial value problems.- Chebyshev methods for integral and differential equations.- Simulation of miscible displacement in porous media by a modified method of characteristic procedure.- Full matrix techniques in sparse Gaussian elimination.- Second order corrections for non-differentiable optimization.- Automatic methods for highly oscillatory ordinary differential equations.- Convergence of a two-stage Richardson iterative procedure for solving systems of linear equations.- Curved knot lines and surfaces with ruled segments.- On the time integration of parabolic differential equations.- Precision control, exception handling and a choice of numerical algorithms.- Generalized hermitian matrices: A new frontier for numerical analysis?.- Some applications of geometry in numerical analysis.- A quasioptimal estimate in piecewise polynomial Galerkin approximation of parabolic problems.

A second-order method for solving the continuous multifacility location problem.- Data smoothing by divided differences.- On the control of the global error in stiff initial value problems.- Chebyshev methods for integral and differential equations.- Simulation of miscible displacement in porous media by a modified method of characteristic procedure.- Full matrix techniques in sparse Gaussian elimination.- Second order corrections for non-differentiable optimization.- Automatic methods for highly oscillatory ordinary differential equations.- Convergence of a two-stage Richardson iterative procedure for solving systems of linear equations.- Curved knot lines and surfaces with ruled segments.- On the time integration of parabolic differential equations.- Precision control, exception handling and a choice of numerical algorithms.- Generalized hermitian matrices: A new frontier for numerical analysis?.- Some applications of geometry in numerical analysis.- A quasioptimal estimate in piecewise polynomial Galerkin approximation of parabolic problems.

Artikelnummer: 9783540111993

Medium: Buch

ISBN: 978-3-540-11199-3

Verlag: Springer

Erscheinungstermin: 01.03.1982

Sprache(n): Englisch

Auflage: 1. Auflage 1982

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 406 g

Seiten: 248

Format (B x H): 155 x 235 mm
