

Algebraic Geometry - Open Problems

Proceedings of the Conference held in Ravello, May 31 - June 5, 1982

On degeneration of projective curves.- Varieties rationnelles et unirationnelles.- Conic bundles on non-rational surfaces.- Moduli of surfaces of general type.- On a proof of Torelli's theorem.- Two examples of algebraic threefolds whose hyperplane sections are Enriques surfaces.- On the Brill-Noether theorem.- Properties of Arakelov's intersection product.- On nodal curves.- About the enumeration of contacts.- Un probleme du type Brill-Noether pour les fibres vectoriels.- On the construction of rational surfaces with assigned singularities.- Postulation des courbes gauches.- Projective geometry of elliptic curves.- Linkage of general curves of large degree.- Some problems and results on finite sets of points in $\mathbb{P}^n$.- Homogeneous bundles in characteristic p .- The group of sections on a rational elliptic surface.- On the Kodaira dimension of the Siegel modular variety.- Generalized Hilbert functions of Cohen-Macaulay varieties.- Some curves in $\mathbb{P}^3$ are set-theoretic complete intersections.- Constructing Enriques surfaces from quintics in $\mathbb{P}^3$.- Prym surfaces and a Siegel modular threefold.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540123200

Medium: Buch

ISBN: 978-3-540-12320-0

Verlag: Springer

Erscheinungstermin: 01.06.1983

Sprache(n): Englisch, Französisch

Auflage: 1. Auflage 1983

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 639 g

Seiten: 418

Format (B x H): 155 x 235 mm
