

Lie Group Representations III

Proceedings of the Special Year held at the University of Maryland, College Park 1982-1983

Matrix coefficients of nilpotent lie groups.- Primary projections on nilmanifolds.- Solvability of left invariant differential operators on nilpotent lie groups.- Harmonic analysis on heisenberg type groups from a geometric viewpoint.- On the plancherel formula for almost algebraic real lie groups.- Harmonic analysis on semisimple symmetric spaces a method of duality.- Partial differential equations on nilpotent groups.- Wave equations on homogeneous spaces.- Symbol mappings for certain nilpotent groups.- Lefschetz formulae for hecke operators.- Harmonic analysis on unbounded homogeneous domains in $\mathbb{H}^n$.- Characters as contour integrals.- Analyticity of solutions of partial differential equations on nilpotent lie groups.- Asymptotic properties of eigenvalues and eigenfunctions of invariant differential operators on symmetric and locally symmetric spaces.- Quantum physics and semisimple symmetric spaces.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540133858

Medium: Buch

ISBN: 978-3-540-13385-8

Verlag: Springer

Erscheinungstermin: 01.09.1984

Sprache(n): Englisch

Auflage: 1. Auflage 1984

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 1440 g

Seiten: 458

Format (B x H): 155 x 235 mm
