

## Multifunctions and Integrands

Stochastic Analysis, Approximation, and Optimization. Proceedings of a Conference held in Catania, Italy, June 1983

Variational systems, an introduction.- Extension of the class of Markov controls.- Limit laws for multifunctions applied to an optimization problem.- Variational properties of EPI-convergence, applications to limit analysis problems in mechanics and duality theory.- Slow and heavy viable trajectories of controlled problems. Smooth viability domains.- A new class of evolution equation in a Hilbert space.- A fixed point theorem for subsets of  $L^1$ .- Modelling sets.- On a definition of  $\gamma$ -convergence of measures.- Strong laws of large numbers for multivalued random variables.- Approaches to weak convergence.- Critical points and evolution equations.- Decomposability as a substitute for convexity.- Multifunctions associated with parameterized classes of constrained optimization problems.- Continuity of measurable convex multifunctions.- Some bang-bang theorems.

*Lieferfrist: bis zu 10 Tage*

**Artikelnummer:** 9783540138822

**Medium:** Buch

**ISBN:** 978-3-540-13882-2

**Verlag:** Springer

**Erscheinungstermin:** 01.12.1984

**Sprache(n):** Englisch

**Auflage:** 1. Auflage 1984

**Serie:** Lecture Notes in Mathematics

**Produktform:** Kartoniert

**Gewicht:** 382 g

**Seiten:** 240

**Format (B x H):** 155 x 235 mm
