

Stochastic Processes and Their Applications

Proceedings of the International Conference held in Nagoya, July 2-6, 1985

Asymptotic behaviour of stochastic flows of diffeomorphisms.- Stochastic ensembles and hierarchies.- A stochastic approach to the minimum principle for the complex Monge-Ampère operator.- Construction of stochastic processes associated with the Boltzmann equation and its applications.- Isotropic stochastic flows and a related property of non-random potential flows.- Explosion problems for symmetric diffusion processes.- Extremal process as a substitution for "one-sided stable process with index 0".- Diffusion model of population genetics incorporating group selection, with special reference to an altruistic trait.- On laplacian operators of generalized brownian functionals.- Precise estimates for the fundamental solutions to some degenerate elliptic differential equations.- On stochastic algorithms in adaptive filtering.- Estimation theory and statistical physics.- Quantum stochastic calculus.- Quantum theory and stochastic processes - Some contact points.- The use of packing measure in the analysis of random sets.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540167730

Medium: Buch

ISBN: 978-3-540-16773-0

Verlag: Springer

Erscheinungstermin: 01.08.1986

Sprache(n): Englisch

Auflage: 1. Auflage 1986

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 359 g

Seiten: 224

Format (B x H): 155 x 235 mm
