

Invariant Theory

This volume of expository papers is the outgrowth of a conference in combinatorics and invariant theory. In recent years, newly developed techniques from algebraic geometry and combinatorics have been applied with great success to some of the outstanding problems of invariant theory, moving it back to the forefront of mathematical research once again. This collection of papers centers on constructive aspects of invariant theory and opens with an introduction to the subject by F. Grosshans. Its purpose is to make the current research more accessible to mathematicians in related fields.

Artikelnummer: 9783540183600

Medium: Buch

ISBN: 978-3-540-18360-0

Verlag: Springer

Erscheinungstermin: 04.11.1987

Sprache(n): Englisch

Auflage: 1. Auflage 1987

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 178 g

Seiten: 106

Format (B x H): 155 x 235 mm
