

Classification Theory

Proceedings of the U.S.-Israel Workshop on Model Theory in Mathematical Logic Held in Chicago, Dec. 15-19, 1985

Classification theory: 1985.- Concrete representations of lattices and the fundamental order.- The classification of small weakly minimal sets I.- Orthogonality of types in separably closed fields.- Countable or $\aleph_1$ -like models of Presburger's arithmetic.- An exposition of OTOP.- Exercises on Local Weight.- Locally modular regular types.- Choosing elements in a saturated model.- Degrees of models with prescribed Scott set.- Shrinking, stretching, and codes for homogeneous structures.- Freedom via forcing: Uniform construction of relatively free or generic structures.- Simple superstable theories.- Universal classes.- Classification of non elementary classes II abstract elementary classes.- On almost categorical theories.

Artikelnummer: 9783540186748

Medium: Buch

ISBN: 978-3-540-18674-8

Verlag: Springer

Erscheinungstermin: 27.01.1988

Sprache(n): Englisch

Auflage: 1. Auflage 1988

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 1580 g

Seiten: 508

Format (B x H): 155 x 235 mm
