

Progress in Artificial Intelligence

11th Portuguese Conference on Artificial Intelligence, EPIA 2003, Beja, Portugal, December 4-7, 2003, Proceedings

When we set about organizing EPIA 2003 in Porto during the APPIA meeting at the previous edition of the conference, EPIA 2001, it was decided that it would be organized by Fernando Moura Pires (Faje) and myself. We chose Beja as the venue to host the conference, as it provided a good support infrastructure and Fernando had a good working relationship with several people at the Beja Polytechnic Institute. Shortly thereafter, Fernando came to know that he was ailing from a disease that was to take his life in May 2003. As with many other projects in which he got involved, Fernando clung to the organization of this conference with dedication and perseverance, even while knowing that he might not see the results of his work. EPIA 2003 is a tribute to his work. Taking up on the successful experience gained from EPIA 2001, we decided to structure EPIA 2003 as a set of 7ve distinct workshops, roughly reflecting the panorama of AI research in Portugal. Special thanks are due to the organizers of each workshop, for the quality and timeliness of the work they carried out. The conference was all the more interesting because of the eight invited presentations and tutorials, by Alexander Bockmayr, AmIcar Cardoso, Dario Freire, Harold Boley, Pedro Domingos, Pieter Adriaans, Veronica Dahland Vitor Santos Costa. There are short one-page abstracts included in these proceedings for some of these presentations.
